### WinZent joins Intel Intelligent Systems Alliance

**Stockholm, October 23<sup>rd</sup> 2013:** WinZent Technologies AB today announced its membership as General Member of the Intel Intelligent Systems Alliance.

The Intel Intelligent Systems Alliance is one of the world's most recognized and trusted technology ecosystems, with more than 250 members covering in excess of 2500 solutions. For WinZent, the membership implies early access to Intel's road maps, test platforms and design support.

"Apart from placing us in the forefront of new leading-edge development in our industry, we believe the membership also confirms the need for alternative firmware and hardware-centric software" says Fredrik Hånell, CEO of WinZent Technologies. "We are proud to be members of an alliance with other major contributors to the Internet of Things".

#### **About WinZent Technologies AB**

WinZent Technologies AB develops and markets the world's fastest and most compact core software for embedded systems. The main products are wIOS (WinZent Instant OS), a real time operating system, and wION (WinZent Instant ON), a BIOS. WinZent was founded in 2013. WinZent Technologies AB is headquartered in Kista, outside Stockholm in Sweden.
